

Company Data

COMPANY FOUNDED

1926

PLANNED EXHIBITIONS
Battery World 2020

Piacenza, Italy - 6/7 May 2020

SPS

Parma, Italy - 26/28 May 2020

Wind Energy

Hamburg, Germany

22/25 September 2020

Bauma China

Shanghai, China

24/27 November 2020

Range of products

- **BATTERY COMPONENTS**
- **ACCESSORIES**

Born in 1926, **Ravioli S.p.A.** is an experienced yet dynamic manufacturer of mechanical and elec-tromechanical devices for industry. Based in Milan, the Company has been developing a high qualitative, solid and reliable network of dealers and partners, starting exporting its products in the '80s. **Designing, projecting and assembling inhouse all the products**, Ravioli maintains the production strongly rooted in the territory, guaranteeing the high quality standards of Made in Italy, accordance to EU Norms and Directives, user-friendly design, customer care and technical assistance as well as innovative and updated solutions for each product. **Ravioli's production offers solutions for different applications: Radio Remote Controls, Push Pendant Stations, Slip Rings and Limit Switches for cranes, hoists, overhead cranes and other machineries for lifting industry; D.C. Contactors, Motor Reversers and Twin Connectors for electrical vehicles for industry such as cleaning machines, material handling, eco-friendly vehicles and aerial platforms.** From 2000, through the project Green emotion, Ravioli started to develop specific products to be applied on wind turbine for the production of wind power.

Ravioli's wide range of Twin Connectors are suitable to link motors, batteries and battery chargers to one another when applied on lifting trucks, aerial platforms, sweepers, scrubbers and other electrical vehicles. Available in DIN and Flat versions, they satisfy the numerous needs of the machinery users'.

D.C. Contactors come in Tecno and Logo series.

Particularly compact and resistant, **Tecno Contactors** are suitable for **handling machinery and industrial electrical vehicles like lift trucks, cleaning machines, nautical applications, trucks and other electrical machinery for road and rail transport.** They're also applied in some innovative fields, like **renewable energy** systems, being used in **converters or on electrical motorbikes.** Ranging from 80 A to 180 A, Tecno D.C. contactors can be supplied with different coil voltages and coil duties, according to the application they have to be used for. They are protected and provided with brackets already mounted for the assembling.

Logo D.C. Contactors are characterised by reduced dimensions yet remarkable power, perfect to be used on industrial handling machines. Double braking contacts are in silver alloy, **particularly suitable for heavy duties.** They can also be manufactured with special knurling which allows to transmit signal currents. The housing is made of a specifically studied material and it is supplied either open, in case you need blow out or closed, to have a higher protection of the contacts. Latching versions are available to reduce coil consumption.

Ravioli's constant attention to safety, the assurance to the user of dealing with a guaranteed Made In Italy product, the commitment to manufacture high standard quality products through certified productive processes, the use of cuttingedge technology, unique design, the provided high performance and the chance for the user to highly personalise the products around the specific needs of each machinery and application, are the significant signs of **Ravioli's care, attention and commitment to provide safe and qualitative products for almost a century.**

Being a reference point in many different markets, Ravioli S.p.A. provides a wide range of customised solutions worldwide and the quality of its products is highly valuable. The Company is considered a reliable partner and the cooperation with important Companies worldwide is the proof of such success. The satisfaction of the customer and the flexibility to provide customised solutions are key factors of the success of the Milanese Company.

Ravioli believes in a better world, from past traditions towards the challenge of the future.
