PLANNED EXHIBITIONS

BATTERY WORLD 2020

Piacenza, Italy - 6/7 May 2020

BATTERY JAPAN

Osaka, Japan - 9/11 September 2020

KEY ENERGY

Rimini, Italy - 3/6 November 2020

ENERGY STORAGE EUROPE

Düsseldorf, Germany - 16/18 March 2021

MIDDLE EAST ENERGY 2021

Dubai, EAU - 22/24 March 2021

INTERSOLAR EUROPE

Münich, Germany - 9/11 June 2021

Kilowatt Labs is a New York City headquartered technology company focused on the creation of innovative products that address the world's energy problems.

The company designs, manufactures and sells energy storage and power management solutions that deliver unprecedented performance across a broad range of industrial, commercial and residential applications, and facilitate the integration of renewable energy into conventional energy distribution systems, ultimately making reliable energy accessible everywhere including in underserved regions.

The idea behind Kilowatt Labs and its technology – were created by Waseem Ashraf Qureshi. He is the inventor behind our technology and co-founder of the company.

He started off with a power management system for minigrids, the Centauri Energy Server and then developed supercap-based storage for cell sites, the Sirius Energy Storage Module.

We are in commercial operations with commercial supplies through our Resellers in the Philippines, Vietnam, Indonesia, Myanmar, Kenya, India, Southern Africa, Nigeria, Pakistan, Italy, Canada, Australia, New Zealand and UAE. We have supplied more than 13MWh of Sirius Storage Modules to the solar, telco, microgrid, streetlight and forklift sectors.

UFLEX is the Kilowatt Labs distributor for Italy and Southern Europe. Uflex is the commercial company of **Ultraflex Group**, that has been active for over **80 years** in various sectors: in the nautical sector with the production of driving and motor control systems for boats, **in renewable energies with the distribution of innovative solutions both off-grid and on-grid**, in civil engineering with a production company of remote control systems for windows and domes, and in automotive industry and agricultural machinery with the production of flexible mechanical systems of remote control, each company of the Group has its own production unit as well as a **factory in Florida (USA)**.

The **UFLEX** founded for **over 30 years** has been dealing with the distribution of components and accessories for boating and energy and for over **20 years the Energy Division** has been created specializing in innovative solutions and components in the field of **renewable energies**.

After 2 years of research and development, **UFLEX** built its first **hybrid power generation system** in 2016, the **HyLander**, which incorporates an integrated endothermic generator in a single transportable case with an **energy storage system** to optimize consumption, system which can also be recharged via a photovoltaic system. Today the system is available with lead and **supercapacitor storage** and in the version without generator as a retrofit application with only supercapacitor storage.

Range of products

- SUPERCAPACITOR STORAGE
